# What is Learning Toolbox

and how does it work?

What is Learning Toolbox?

Learning Toolbox is a mobile platform to easily organise knowledge and information, and share it with colleagues and peers across job sites.

1. Information

2. Communication

3. Cooperation

Multimedia Content	Learning Toolbox	Sites
Photos Videos Audio		Workshop
Presentations Documents		Training
Web Links Apps		Field

LEARNING TOOLBOX *for Knowledge Creation and Sharing*

created by **Kubify**

How does Learning Toolbox work?

With the **Stack Editor** you can easily create collections using drag and drop. Authors can decide whether a collection is open for everybody to see or whether it is restricted to users registered in an organisation's domain.

You publish your collections in your own **Stack Store** and users can access them with the **LTB App** (Android und iOS) on their tablet or smartphone. Collections can also be viewed in a normal browser on the PC or the mobile device.

Every collection can be accessed and shared with users over their own **QR code** and **web link**. You can for instance put up the QR code in a visible location or send the web link per email or WhatsApp to colleagues or course attendants.

What can you do with

Learning Toolbox?

created by
Kubify

What can you do with Learning Toolbox?

Quickly and easily create collections of multimedia content

Share collections with others using a QR code or a link

Users can upload their own content if allowed by authors

1. Organise and share content

LEARNING TOOLBOX *for Knowledge Creation and Sharing*

created by **Kubify**

What can you do with Learning Toolbox?

Authors can update and extend their collections with new content at any time

Collections can link to each other, similar to linking web pages

Collections can be linked across different domains

2. Update, extend, and link collections
